Profile

Backend developer with 3 years of experience. Currently a senior student in Management Information Systems at Pamukkale University. Developed projects using C#, .NET Core, Blazor, and ASP.NET. Experienced in Microsoft SQL Server database design and management. Familiar with modern approaches such as Clean Architecture, SOLID principles, and layered architecture, aiming to apply technical skills to real-world projects.

Education

Pamukkale University , B.Sc., Management Information Systems	Sep 2022 – Jun 2026
• GPA: 2.94/4.0	
Tire Social Sciences High School	Sep 2016 – Jun 2021

Experience

Full Stack Intern , Datakod – Izmir/Balçova	Jun 2025 – Jul 2025
• Completed a 30-day compulsory internship. Tasked with independently developing a project: built a B2C e-commerce site for pet products using .NET 8 and Blazor Server.	
• Implemented multi-layered architecture, Entity Framework Core, SQL Server, MudBlazor, and Bootstrap.	
• System included 3 user roles (admin, supplier, customer) with role-based authorization and 10+ functional modules, improving development efficiency.	
Content Writer , Huawei Student Developers Turkey – Remote	Mar 2025 – Present
• Write articles for Huawei Student Developers Turkey's Medium page.	
• Intro to Data Science	
• Types of Data Analysis	
Project Management Intern , SCA Social – Remote	Oct 2024 – Nov 2024
• Completed a 4-week online internship in Project Management, covering Organization Management, Advertising Marketing, Project Management Fundamentals, and Digital Transformation.	
• Developed skills in project planning, team coordination, and time management.	
• Created digital campaign ideas for different sectors and compiled a final portfolio.	
• Portfolio Link	
Community Member , Management Information Systems Community – Pamukkale University	Jul 2023 – Feb 2024
• Contributed to R&D and design processes, assisted in event planning and presentation preparation.	

Projects

PetSas E-Commerce Website	Jun – Jul 2025
• B2C e-commerce application for pet products developed with .NET 8 and Blazor Server.	
• Includes multi-role user management (admin, supplier, customer) simulating a real e-commerce scenario.	
• GitHub Link	
Chess Tournaments Database	Jan 2025
• Designed a relational database in SQL Server to manage players, matches, and scores for chess tournaments.	
• GitHub Link	
TV & Movie Blog – ASP.NET, MSSQL, C#	Feb 2025
• Developed a blog platform allowing users to view and comment on TV and movie content.	
• GitHub Link
